## TITLE INDEX, VOLUME 17 (1988)

A comparison of student feedback obtained from three methods of formative evaluation of instructional materials, 3

An analysis of guidelines for expert reviewers, 101

Analogical instruction within the information processing paradigm: effective means to facilitate learning, 129

Analogies in science and social studies, 169

Applying artificial intelligence insights in a CAI program for "open sentence" mathematical problems in primary schools, 263

Biochemistry reasoning and the structure of knowledge, 57

CAI versus paper and pencil – discrepancies in students' performance, 77

Confronting misconceptions in the domain of simple electrical circuits, 29

Diagrammatic representations and verbal explanations in learning from social science texts, 219

Encoding of text, 145

Evaluation (formative) of instructional materials, a comparison of student feedback obtained from three methods, 3

Evaluation of instructional materials: an analysis of guidelines for reviewers, *101*

Facilitation of learning via analogical instruction, 129

Fragments: the implications for teachers, learners and media users/researchers of personal construal and fragmentary recollection of aural and visual messages, 195

*Generalising language-tutoring systems:* a French/Spanish case study, using LINGER, 179

Instructional prescriptions and cognitive learning theory, 301

*ITS and generative student models, 235*

ITS for basic algebra using skill-oriented task *sequencing, 281*

ITS for language-tutoring, 179

Learning about forces: simulating the outcomes of pupils' misconceptions, 251

Learning processes, a motive/strategy model, 159

Learning-to-learn and thinking skills, 387

Learning-to-learn: a critical appraisal with some proposals, 351

Linking cognitive learning theory to instructional prescriptions, 301

Media choice implications of personal construal and fragmentary recollection of aural and visual messages, 195

Misconceptions in learning mechanics, simulations of, 251

Misconceptions in the domain of simple electrical circuits, 29

Paper and pencil versus CAI – discrepancies in students' performance, 77

Problem solving beyond the logic of things: contextual effects on understanding and solving word problems, 309

Reasoning and the structure of knowledge in Biochemistry, 57

Representating conceptual knowledge in memory, 339

Skill-oriented task sequencing in an intelligent tutor for basic algebra, 281

Some reflections on thinking skills, 387

Teaching for learning-to-learn: a critical appraisal with some proposals, 351

The development of the representation of conceptual knowledge in memory, 339

The interrelations between diagrammatic representations and verbal explanations in learning from social science texts, 219

*The motive/strategy model of learning processes:* some empirical findings, 159

The pedagogical limitations of generative student models, 235

Verbal and spatial encoding of text, 145

When is a science analogy like a social studies analogy? A comparison of text analogies *across two disciplines, 169*

Word problems, CAI program in primary schools, 263

Word problems, contextual effects, 309

## AUTHOR INDEX

Barnard, Y., 263
Brna, P., 29
Burdorf, C., 281

Curtis, R. V., 169

Dickson, L. A. S., 145
Dijkstra, S., 339

Finegold, M., 251

Gagné, R. M., 387
Geis, G. L., 101
Gorsky, P., 251
Guri-Rosenblit, S., 219

Hativa, N., 77
Hotta, H., 281

Klauer, K. J., 351
Kulhavy, R. W., 145

Laurillard, D. M., 235

Mason, J., 195
McArthur, D., 281
Medley-Mark, V., 3

Newby, T. J., 129

Peter, O., 281
Ploger, D., 57

Rasch, M., 301
Reusser, K., 309

Sandberg, J., 263
Saroyan, A., 101
Schrankel, P. S., 145
Stasz, C., 281
Stepich, D. A., 129

Tennyson, R. D., 301

Uren, J., 179

Watkins, D., 159
Weston, C. B., 3

Yazdani, M., 179

## BOOKS REVIEWED

Boud, D., Dunn, J., Hegarty-Hazel, E., *Teaching in laboratories* (Daffydd Evans), 191

Daloz, L., *Effective teaching and mentoring – realizing the transformational power of adult learning experiences* (Bob Zimmer), 97

Foster, D. and Lock, R., *Teaching science 11–13* (John Head), 278

Jones, A., Scanlon, E. and O'Shea, T., *The computer revolution in education: new technologies for distance teaching* (Gary Boyd), 277

Laurillard, D. M. (Ed.), *Interactive media: working methods and applications* (Michael Hannafin), 189
